Triterra is a professional environmental consulting firm specializing in brownfield development, environmental consulting, and natural resource management services. Our staff is committed to providing practical environmental solutions through a creative process that incorporates integrity, innovation, and responsiveness.

PROJECT HIGHLIGHT

THE STADIUM NORTH LOFTS AND SENIOR LOFTS

The newly completed **Stadium North Lofts** and **Senior Lofts** have transformed a once-neglected stretch along Cedar and Larch Streets. This \$33 million development features 143 modern apartment units, contributing to the city's vision for increased urban density and growth. The project reflects a collaborative effort, turning a vacant area into a vibrant residential hub.

A key focus of the project was environmental safety. Triterra, in coordination with city officials, **Regenesis**, **Land Science**, and additional environmental experts, managed the removal of over 15,700 cubic yards of contaminated soil and installed vapor mitigation systems to ensure a healthy living environment for future residents.

Beyond providing housing, the Lofts have created new employment opportunities, including two full-time positions in property management and leasing, and two part-time roles for maintenance and janitorial services. The project has also spurred further investment in the neighborhood, raising property values and supporting local businesses.

This development is more than just new buildings—it's a catalyst for revitalization, boosting property tax revenue and supporting long-term community growth. The Stadium North Lofts stand as a symbol of smart development and sustainable progress, helping to shape a stronger and more dynamic future for the city.

MEET THE STAFF

KYLE CLARK

At Triterra, Kyle Clark serves as the Director of Industrial Hygiene Services. Kyle truly does a little bit of everything here! As the head of our Industrial Hygiene Services group, which he proudly declares as the best group at Triterra, Kyle also plays a vital role in our Operations and Business Development Teams. With a degree in Biology focusing on Environmental Health and Safety (EHS) from Central Michigan University, Kyle brings 12 years of industry experience to our team. His career spans from small residential projects to managing million-dollar abatement and demolition ventures. Kyle is currently pursuing the Certified Hazardous Materials Manager (CHMM) certification to further expand his expertise. Kyle describes Triterra as "the best place that I have ever worked." He values our open-door policy and the flexibility he has to lead the Industrial Hygiene Services group. "I love that I am trusted in my vision and path for my staff," Kyle shares. It's the staff and clients, he says, that keep him excited to come to work every day, knowing that each day presents a fun and exciting challenge with the support of a great team. Outside of work, Kyle enjoys spending time with his wife and dogs as they build a new home in West Michigan, all while preparing for the arrival of their first child. He is also an avid golfer and a passionate fan of the Detroit Lions. His favorite quote, "A smooth sea never made a skilled sailor," by FDR, encapsulates his approach to work. Kyle believes that the most valuable lessons are learned from challenging projects, not the ones that go smoothly.
